

# Central Motorway Major Maintenance

<b>Contract Value</b>	£2.1M	<b>Commenced</b>	Mar 2004
<b>Contract Period</b>	22 Weeks	<b>Completed</b>	Aug 2004

## Features

- NEC Short Contract
- Traffic Management- City motorway
- Concrete repairs; parapets: waterproofing
- Road surfacing; resealing expansion joints
- Works on viaduct

## Brief Description

The Central Motorway A167 (M) in Newcastle includes a viaduct section immediately to the east of the city centre which connects with the Tyne Bridge. A major programme of maintenance and refurbishment works is being carried out under the contract including concrete repairs to retaining walls and viaduct support columns and resealing of the expansion joints in the viaduct.

Working within the environment of an urban motorway involves extensive traffic management and health and safety measures

Other works include road resurfacing, parapets (including plinths), waterproofing, drainage, service ducts and the construction of barriers and concrete verges.
